Omni Pro[110] PC

Refreshingly simple design.
Proven performance. Great price.

The innovative all-in-one business PC from HP.

Windows®. Life without Walls. HP recommends Windows 7.

The HP Omni Pro[110] PC offers a full performance Intel computing experience in an innovative all-in-one design. Easy to set up and ready to meet your business needs right out of the box. ENERGY STAR® qualified models are designed to help reduce impact on the environment. The HP Omni Pro[110] keeps things simple so you can focus on your business.

Refreshingly simple design
The space-saving, streamlined design frees up your desktop space for an uncluttered computing experience. The 20" diagonal widescreen, HD anti-glare display[11], integrated high-performance stereo speakers, webcam[12], and microphone make this PC work ready. Conveniently positioned ports right at your fingertips, two (2) USB 2.0 ports on the left and four (4) in the rear, provide easy access for transferring data or adding other USB devices.

Proven technology
Intel processors and the Intel G41 chipset equip you with proven performance that you can rely on. Whether you need solid or superior performance for your business applications, we have the processor for you. Intel® Pentium® or Intel® Core™ 2 Duo[3]allow you choose what works best for your business. See Quick Specs for specific technical information.

Flexibility when you need it
This PC is flexible enough to grow as your business grows. You can add storage or a bigger hard drive as your needs change. The choice is yours: up to 4 GB DDR3 SDRAM memory[2] and hard drives up to 1 TB[1].

Optional tray load SuperMulti DVD Writer Drive[4] offers fast access to help back up your data. An integrated 6-in-1 Media Card reader let you easily transfer files from your PC to various types of memory cards.

Software
Preinstalled software enhances your PC experience. HP tested and qualified so you can be productive right out of the box. Choice of Operating System includes: Windows 7*, RedFlag Linux[11] or FreeDOS.

Protect your business
Enhance your defenses with customized security solutions designed by HP. HP Protect Tools for Small Business[7], an optional feature, is an integrated suite of security control modules that help protect every aspect of your PC security from your data, to your connections to the PC itself.
Norton Internet Security is preloaded (60-day trial)[5] to give your business broad-coverage security. You get continuous, up-to-date protection against viruses, spyware and identity theft.

Reduce your impact on the environment
You could even reduce your impact on the environment with ENERGY STAR® qualified models.
And you can gain even more control with HP Power Assistant[10]. This optional software keeps your PC ready to go when you need it and helps conserve electricity when you're away. It helps reduce PC energy consumption without impacting productivity.

The HP Omni Pro[110] All-in-One is all you need: refreshingly simple design and proven Intel performance, all at a great price.

THE COMPUTER IS PERSONAL AGAIN.

HP Omni Pro[110] All-in-One Business PC

Windows®. Life without Walls.
HP recommends Windows 7.

HP Omni Pro[110] All-in-One Business PC

Windows®. Life without Walls.
HP recommends Windows 7.

Please see the HP Omni Pro[110] All-in-One PC Quick Specs document for additional detailed specifications and information. See www.hp.com/go/businessdesktopPCs for more information about HP Business Desktop PCs.

*Systems may require upgraded and/or separately purchased hardware to take full advantage of Windows 7 functionality. Not all features are available in all editions of Windows 7. See http://www.microsoft.com/windows/windows-7/ for details.

1. For hard drives, GB = 1 billion bytes. TB = 1 trillion bytes. Actual formatted capacity is less. Up to10 GB (for Vista) and up to 16 GB (for Windows 7) of disk space is reserved for the system recovery software.
2. Up to 1 GB may not be available with 32-bit operating systems due to system resource requirements. Dual Channel is only supported when the system is configured with DDR3 symmetric memory (i.e. 2 x2GB).
3. 64-bit computing on Intel architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers and applications enabled for Intel® 64architecture. Processors will not operate (including 32-bit operation) without an Intel 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. See www.intel.com/info/em64t for more information. Dual Core is designed to improve performance of certain software products. Not all customers will necessarily benefit from the use of this technology. Intel's numbering is not a measurement of higher performance.
4. Don't copy copyright-protected materials. Actual speeds may vary. Double Layer discs can store more data than single layer discs; discs burned with this drive may not be compatible with many existing single-layer DVD drives and players. Note that DVD-RAM cannot read or write to 2.6GB Single Sided/5.2 GB Double Sided – Version 1.0 media.
5. 60-day trial period. Internet access required. First update included. Subscription required for updates thereafter.
6. Wireless access point and Internet service required and sold separately.
7. Service levels and response times for HP Care Packs may vary depending on your geographic location. Restrictions and limitations apply. Service starts at date of hardware purchase. For details, visit www.hp.com/go/lookuptool.
8. Power calculations and cost calculations are estimates. Results will vary based on variables, which include information provided by the user, time PC is in different power states (on, standby, hibernate, off), time PC is on battery or AC, hardware configuration, variable electricity rates and utilities provider. HP advises customers to use information reported by HP Power Assistant for reference only and to validate impact in their environment. Environmental calculations were based on U.S. EPA eGrid 2007 data found at www.epa.gov/egrid/. Regional results will vary. HP Power Assistant requires Microsoft Windows to operate.
9. HD content required to view HD images.
10. Internet access required.
11. Not available in all countries.
